SIDE PROJECTS

- Built a browser app to host exam questions, record scores and print exam result reports.
- Built a Windows network utility app to manage X500 directory trees, used by helpdesk and I.T support. A client funded future development of the app which was later sold to external clients.
- Reverse engineered a major vendor's file server security in order to re-set a lost root admin password.
- At a client's request, successfully legitimately hacked a major vendor's corporate wide messaging system to prove it was not secure!

EDUCATION

MSC Computing modules passed, M865 Project Management OU Business School Prince II equivalent

Certificate of Education

16th Ed Qualified Electrician

BTEC Electronics and Micro processing

ABOUT ME

Since childhood my favourite pastime has been to take apart toys, watches and electronic items to see how they work; reassembling them to see if they would still work with fewer parts or make them work in a more interesting way.

Today I continue to be inspired by innovative approaches to creating and modifying products and services for businesses and start-ups.
